INTERNSHIP

MERN Stack Intern – Consensus Academy **Jan 2025**

Acquired hands-on experience in working with MongoDB, ReactJS, Express, and NodeJS. This opportunity strengthened my ability to develop projects using the MERN stack and expanded my knowledge of advanced HTML and CSS.

PROJECTS

Nanba's Dashboard: Tech stack: MERN stack **2025**

Developed and deployed a Project Management Tool for a start-up named Agro Nanba using React, MongoDB, and NodeJS. The System is designed to streamline employee monitoring, performance tracking and company-wide activity management The Platform Integrates a secure authentication system enabling personalized dashboards for each employee and manager.

Retail Point of Sale: Tech stack: Java, MySQL, JDBC, Eclipse **2024**

Developed a console-based Retail Point of Sale (POS) System using Java, MySQL, JDBC, and Eclipse. The system efficiently manages product information, processes sales transactions, handles refunds and returns, and manages user accounts with role-based access. It supports inventory updates, multiple payment methods, receipt generation, and provides detailed sales and inventory reports. Ensured smooth database operations with MySQL and JDBC, enabling accurate transaction handling and real-time inventory tracking.
